## **DID YOU ALL KNOW THIS ????** **I DIDN'T ...**

I've been using aluminum foil for more years than I care to remember. Great stuff, but sometimes it can be a pain. You know, like when you are in the middle of doing something and you try to pull some foil out and the roll comes out of the box. Then you have to put the roll back in the box and start over. The darn roll always comes out at the wrong time.

Well, I would like to share this with you. Yesterday I went to throw out an empty Reynolds foil box and for some reason I turned it and looked at the end of the box. And written on the end it said, 'Press here to lock end'. Right there on the end of the box is a tab to lock the roll in place. How long has this little locking tab been there? I then looked at a generic brand of aluminum foil and it had one, too. I then looked at a box of Saran wrap and it had one too! I can't count the number of times the Saran wrap roll has jumped out when I was trying to cover something up.

I'm sharing this. I hope I'm not the only person that didn't know about this.  
Bev

## ***Did you Know...***

How to pick a sweet onion...

- Onions that have a point on the top and bottom are HOT.
- Onions that are round are mild.
- Onions that are flat on the the bottom are SWEET.

Peppers with 3 bumps on the bottom are sweeter and better for eating. Peppers with 4 bumps on the bottom are firmer and better for cooking.

Peel a banana from the bottom and won't have to pick the little "stringy things" off of it. That's how the primates do it. Take your bananas apart when you get home from the store. If you leave them connected at the stem, they ripen faster.
